JOB DESCRIPTION

Position Title: Tech Lead
Immediate Superior: Engineering Manager
Department: Development

Job Overview

As a Tech Lead, you will play a pivotal role in overseeing the technical aspects of our projects, ensuring the alignment of technical solutions with business goals, and leading a team of engineers to deliver high-quality software products. You will be responsible for making technical decisions, mentoring team members, and collaborating with various stakeholders to drive the success of our digital initiatives. The ideal candidate will have strong background in software development, a deep understanding of technology trends, and a passion for innovation.

Roles & Responsibilities:

- Lead the design, development, and deployment of scalable software solutions for our digital products.
- Collaborate with product managers, designers, and other stakeholders to define project requirements and deliverables.
- Provide technical guidance and mentorship to a team of software engineers, fostering a culture of continuous learning and improvement.
- Ensure the technical feasibility of UIUX designs and optimize applications for maximum speed and scalability.
- Conduct code reviews, enforce coding standards, and ensure adherence to best practices in software development.
- Identify and resolve technical challenges, ensuring the delivery of robust and reliable software solutions.
- Stay up-to-date with emerging technologies and industry trends, and advocate for their adoption when appropriate.
- Manage technical risks and issues, proactively finding solutions to mitigate potential challenges.
- Coordinate with DevOps teams to ensure smooth deployment and operation of software applications.
- Contribute to the strategic direction of the company by providing technical insights and recommendations.
